PROFILE

Recent graduate with a master's degree in Data Analytics and Artificial Intelligence from Ibn Zohr University. Started as a web developer, moved into software development, and gradually discovered a passion for Data and AI through hands-on projects and internships. Eager to keep learning, strengthen my technical skills, and contribute to real-world projects. Having consistently ranked among the top students in my class, I aim to bring the same dedication and commitment to my professional career.

PROFESSIONAL EXPERIENCE

Smartovate *Feb 2026 - Jun 2026*
Data & AI Engineer (Final-Year Project Intern, final grade 18/20) *Remote (London, United Kingdom)*

- Collected and processed 10,000+ LinkedIn profiles using Apify, SerpAPI, and Python to build a dataset for model fine-tuning.
- Fine-tuned two Azure OpenAI models and evaluated them using behavioral tests and an LLM-as-a-Judge approach. Achieved a 36.4% improvement in profile optimization scores, 95.41% validation accuracy, and a 28.7% improvement in post generation scores.
- Investigated poor post-generation results and improved data quality through a gold, silver, and bronze curation process.
- Integrated RAG into the AI assistant and used LangGraph to orchestrate tasks in key features of Subul IN, a Chrome extension deployed using Azure App Service.

Smart Maint Company *Aug 2025 - Oct 2025*
Data Analyst Intern *Remote (Casablanca, Morocco)*

- Collected and cleaned LinkedIn profiles of maintenance and reliability professionals using Apify, SerpAPI, and Python.
- Separated English-speaking and French-speaking profiles and performed exploratory data analysis using descriptive statistics and visualizations to identify trends, skills, and professional fields.
- Applied K-means clustering to identify three professional segments and presented a report with visualizations and actionable business recommendations to management.

Tweadup Agency *Apr 2023 - Jun 2023*
WordPress Developer (End-of-Studies Internship) *Agadir, Morocco*

- Developed custom websites and plugins in collaboration with the agency's technical team, using WordPress, PHP, HTML, CSS and JavaScript.

Al Ahd El Jadid Library *Aug 2022 - Sep 2022*
Full Stack Developer Intern *Agadir, Morocco*

- Built an information system for the library's digital catalogue, including database integration.

EDUCATION

Ibn Zohr University - Agadir, Faculty of Sciences *2024-2026*
Master's Degree (Excellence Track) in Data Analytics and Artificial Intelligence

Ibn Zohr University - Agadir, Faculty of Sciences *2023-2024*
Bachelor's Degree (Excellence Track) in Data Analytics and Artificial Intelligence

Higher School of Technology - Agadir *2021-2023*
University Diploma of Technology (DUT) in Computer Engineering

TECHNICAL SKILLS

AI Systems & Large Language Models (LLM): LangGraph, Deep Learning, RAG, Agno, Hugging Face / Transformers, embeddings, prompt engineering, model fine-tuning, Azure OpenAI.
Production & Backend: Python, FastAPI, Docker, Azure (App Service, Cosmos DB), Git/GitHub, model versioning and automated evaluation pipelines.
Data & Machine Learning (ML) Fundamentals: Power BI, Pandas, NumPy, Scikit-learn, SQL, Excel, Hadoop, ETL, PySpark, EDA, feature engineering, statistical analysis, PCA and clustering.
Computer Vision: OpenCV, MediaPipe, Convolutional Neural Network (CNN), PyTorch, TensorFlow, image and gesture recognition, NLP.
Web Scraping & Data Collection: Selenium, DOM scraping, SerpApi, Apify.

ACADEMIC PROJECTS

More projects: Portfolio/Projects

CyberMentor: AI-powered cyberdefence assistant using Python, NLP, LLM, RAG and a Chroma vector database for attack classification and defence recommendations.
AI Painter: Real-time gesture-based drawing application (computer vision) built with Python, OpenCV and MediaPipe.
PredictEnergy-MA: Electricity consumption forecasting pipeline (time series) using Hadoop, PySpark, Extract-Transform-Load (ETL), Python and machine learning.
